What is Britannica Library?

Britannica Library is an online encyclopedia specifically designed to provide accurate information in an age-appropriate format.

Articles are available in three levels—Kids, Teens or Adults—and include images, videos, maps, related articles, citations and research tips. There's even an option to 'read aloud'.

With over 100,000 articles for any reading level, Britannica Library is the perfect companion for primary school projects, high school research assignments and adult special interest work.

What can I use it for?

Britannica is used for finding useful, up-to-date and relevant information about any topic under the sun. It is especially helpful for school and personal research projects as it provides credible sources, photos, videos and linked to reliable related websites.

New topics are added frequently, including information about the current COVID-19 pandemic.

To get started, go to the following web address, click on 'Britannica' and enter your card number for free access:
